## BLACK EDITION – NOBLE AND HIGH QUALITY

In 2017, KARCHER DESIGN was one of the first suppliers to launch modern and minimalist door handles in its finish Cosmos Black to the German market. The concentrated matt and deep black surface is reminiscent of the depths of the cosmos.

The surface is complimented by its very pleasant and soft-touch feel of quality and outstanding design. The colour cosmos black completes modern interior design concepts and is eye-catching on every door.

Inspired by the moons of Saturn, KARCHER DESIGN developed the shade Titan Grey. Titan Grey impresses with its matt surface and warm grey colour. When cold light falls on the door handle, the Titanium Grey colour reflects a soft light ambience. With its metallic shimmer, the pleasant depth of colour blends into the overall aesthetic of a room.

The oil rubbed bronze finish door handles, with their dark brown coating, imposes a warm, calm character, which is additionally emphasised by an extremely supple surface. Sanding the edges creates fine bronzed contours that set noble accents. In relevance to the Karcher Design range, oil rubbed bronze is specially designed for contemporary models with clearly defined edges.

## COSMOS BLACK – MISSION INVISIBLE

## BICOLOR – ELEGANT DUET OF COLORS

NEW

The KARCHER DESIGN range "Mission Invisible" is dedicated to a modern and pure interior design, placing focus on minimalist design. A 30 mm small mini rose was developed, which almost completely disappears behind the door handle. Combined with the three new design models Soho, Boston and Brooklyn, the door fitting is reduced to its bare minimum.

**Soho – ER57M**

**Boston – ER58QM**  
by Karcher Design

**Brooklyn – ER59M**  
by Itamar Harari

NEW

With color combinations of the multiple award-winning trend color Cosmos Black and classic matt stainless steel, the KARCHER DESIGN door handle Rhodos ER28 is right on the pulse of time. One of the two colors is dominant, the other one sets lightening accents that make the door handle look vibrant. High-quality materials provide a visible value and make the simple form of the door handle an eye-catcher in individually designed rooms.

## COSMOS BLACK – SLIDING DOOR HANDLES

## COSMOS BLACK – LEVER SET ON BACK PLATE

KARCHER DESIGN offers a wide range of lift-slide door handles for patio doors. You can also choose between the oval or rectangular version to match the interior design. A outside sliding door handle in the same colour tone can also be fitted, which is included in the EHSSET. In addition to the cosmos black finish, these are also available in oil rubbed bronze (p.19).

## OIL RUBBED BRONZE – ACCESSOIRES

EF284  
window handle  
matching to ER28EF464Q  
window handle  
matching to ER46Q

This finish, applied by electroplating, gives stainless steel door handles with their dark brown coating a warm, calm character, which is further emphasised by an extremely smooth surface. Grinding along the edges of the handles creates fine bronze-coloured contours that set noble accents. This effect is particularly effective in office buildings

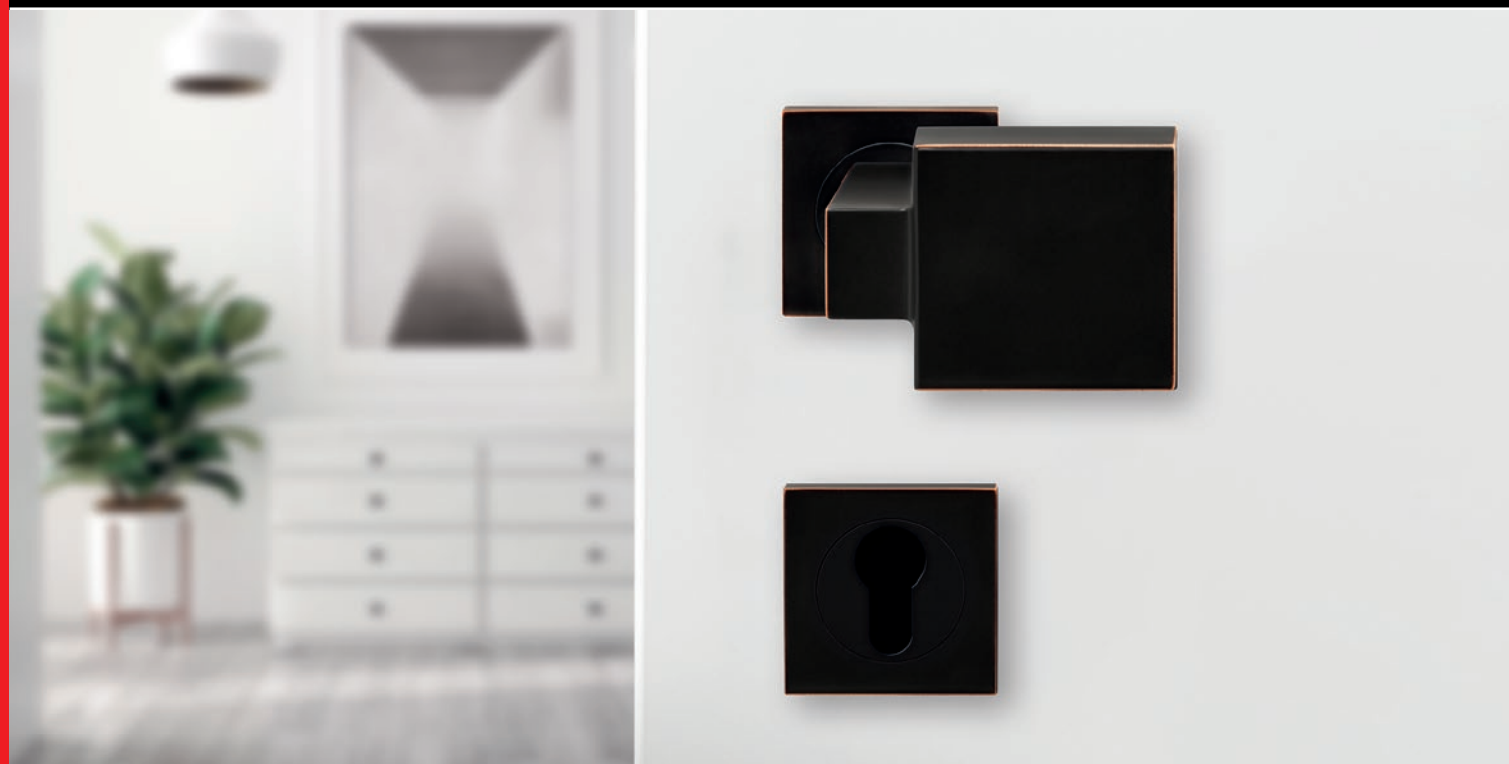

and other public facilities. Accordingly, oil rubbed bronze is specially designed for models with clearly defined edges.

The door handles are tested according to DIN EN1906 and certified with use category 3.
